Summary

Detail-oriented and passionate Computer Science student at Western Washington University. Know up-to-date full-stack web development tools and Java. I am excited to apply knowledge to a greater impact and continue expanding upon my current knowledge.

Projects

Galactic Shooter - *React, Typescript, Express, MongoDB, WebSockets*

Engineered a 2D game featuring real-time multiplayer functionality.

Integrated a dynamic leaderboard system to track and display player scores in real-time.

Portfolio Website - *React, Typescript, AWS CloudWatch & Amplify*

Developed a personal portfolio website showcasing projects and skills, employing React and TypeScript to ensure an interactive and engaging user experience.

Implemented responsive design elements and UI components to enhance user interaction and navigation.
