SUMMARY

Detail-oriented Computer Science student at Western Washington University (GPA: 3.79/4.00) with hands-on experience in C#, React, TypeScript, and SQL through academic research and an internship at FAST Enterprises. Knowledgeable in building scalable web applications, debugging production systems, and collaborating with cross-functional teams. Excited to apply and expand technical expertise in software development.

EDUCATION

Western Washington University

Bachelor of Science in Computer Science

- Currently maintaining a 3.76 GPA

Bellingham, WA

September 2022 – June 2026

Western Washington University

Web Development Bootcamp

- Finished with a 98.4%

Bellingham, WA

June 2024 – September 2024

Clover Park Technical College

Associates of Applied Science in Automotive Technology

- Graduated with honors maintaining a 3.96/4.00 GPA
- Received Presidents Award for 4.00 GPA quarters

Lakewood, WA

September 2020 – June 2022

EXPERIENCE

Implementation Consultant Intern

FAST Enterprises

- Developed C# applications following the company's best practices to solve real financial unemployment issues
- Collaborated with cross-functional teams to research and design software solutions.
- Partnered directly with government clients to gather requirements and deliver tailored technical solutions.
- Delivered an urgent production fix in 1 day (ahead of 2-day deadline) that restored user sign-up functionality and prevented widespread downtime.
- Designed and maintained SQL queries to handle datasets containing millions of rows efficiently.

June 2025 - September 2025

Boston, MA

Undergrad Research - Smart Home Data Privacy

Western Washington University

- Maintained and developed a React + TypeScript frontend to visualize data collected by smart home devices.
- Designed and implemented an interactive home-map interface that allows users to set up, organize, and control smart home devices.
- Built UI components using Material UI to provide a modern and intuitive system.
- Collaborated with backend researchers to integrate APIs and collect real-time device data.

Mar 2025 - June 2026

Bellingham, WA

PROJECTS

Portfolio Website | *React, TypeScript, AWS Amplify*

- * Developed a personal portfolio website showcasing my projects and skills
- * Implemented responsive design and UI components to support cross-device compatibility.
- * Implemented code modularity to improve code re-usability and readability
- * Website Link: <https://www.pphillips.dev/>

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, C#, SQL, HTML/CSS, Java, C

Frameworks: React, Node.js, MongoDB, Socket.IO, BootStrap

Developer Tools: Git, GitHub, AWS Amplify, Visual Studio Code, Linux, Ubuntu
